

## Capabilities Statement

### PROFILE:

SupaTech, Inc. – a woman owned, SBA certified 8(a)/SDB and State of Texas HUB company, is an innovative information technologies provider offering a broad array of enterprise automation solutions, custom development, computing infrastructure and networking services to Government agencies and private sector companies.

As a distinctive “One Source” vendor, SupaTech delivers an encompassing range of superior quality, cost effective information technology products, solutions and services which provide our customers with a long-term IT strategy for optimal business performance.

### COMPANY:

SupaTech is a certified woman-owned, disadvantaged small business. Since our inception in 1980, SupaTech, through its originating subsidiary Computer Cable Installation Co. (CCI), has provided a wide range of technical services to prominent government agencies and Fortune 500 companies including NASA, National Guard Bureau, American Eurocopter, GTECH, SBC, Pilgrims Pride and Goodyear. SupaTech's co-founder and President, Sue Glover and her team have earned a stellar reputation for delivering high-quality IT products and services to their customers consistently "on time" and "on budget".

### GENERAL IT PRODUCTS & SERVICES:

#### Enterprise Automation Solutions

SupaTech's advanced Enterprise Automation portfolio includes: general Business Process Management Systems; intelligent paper-to-digital imaging; as well as real-time Data Visualization tools for automated Business Activity Monitoring, “forward-looking” Executive Dashboards and dynamic data presentations using interactive calculators and graphical simulations.

#### Custom Development and Integration

SupaTech's custom development and integration services combine Best Practice .NET and J2EE programming environments with standards-based, service-oriented integration methods to unify heterogeneous applications and databases into web-based, process-aware Enterprises.

#### Paperless Mobile Forms

PowerForms Designer and Editor allow businesses to create and fill out electronic forms using a keyboard or digital pen. PowerForms offer an intuitive, non-programmatic means of creating custom electronic forms quickly and easily to automate the distribution, collection and verification of data to and from mobile workers. I-MobileForms allows the mobile workforce, utilizing Tablet PC's to work in an office mode in the field, capture data into forms (handwriting or text) and automatically update the data to a central database through a simple synchronization operation.

#### Computing Infrastructure Sales

Through preferred reseller agreements, SupaTech sells literally thousands of competitively priced infrastructure, server and personal computing products from leading manufacturers such as;
